

ANTIBIOVIA

(Herbal antibacterial)

Antibiovia is a herbal composition containing Turmeric Oil, Tulsi, Clove, Garlic, Eucalyptus, Menthol, Amla, Neem Along with other Antibacterial and Growth promoter herbs which helps to control infection and promote growth in the birds. This product is highly effective against many harmful bacteria including Salmonella and E. Coli. It also acts as an antioxidant and anti-inflammatory thereby helps in speedy recovery of the birds from diseases.

Composition:

Turmeric Oil, Tulsi, Clove, Garlic, Eucalyptus oil, Menthol, Amala, Neem along with other Antibacterial and Growth promoter herbs

Benefits:

1. Uniform granule helps in easy mixing with feed
2. Highly effective antibacterial growth Promoter
3. Helps to control different types of bacterial infection
4. Helps to prevent respiratory diseases in the birds
5. Helps to improve growth and body weight in the birds
6. Improve bird performance and egg production in the birds
7. Helps to prevent bacterial resistance against different medicines

Usage:

500 gm/ Ton of Feed Or
As recommended by the Veterinarian

Packing: 25Kg

ANTICOCC

(Herbal anticoccidial)

Anticocc is a potent anticoccidial product containing Yucca, Calendula, Allium Sativum, Tinosporacordifolia, Neem, Amla, Turmeric oil along with other anticoccidial herbs. This product helps to control coccidial infection in the farm. It is effective against all types of coccidia including *Eimeria tenella*, *Eimeria necatrix* and other coccidial organisms.

Composition:

Yucca, Calendula, Allium sativum, Tinospora cordifolia, Neem, Amla, Turmeric Oil and other Anticoccidial herbs.

Benefits:

1. Uniform granule helps in easy mixing with feed
2. Highly effective in coccida control program
3. Effective against all types of Coccidial infection
4. Helps to break the coccidial cycle in the birds
5. Improves body weight in the birds
6. Improves bird performance

Usage:

500 gm per ton of feed

Or

As recommended by the Veterinarian

Packing: 25Kg

DIARACARE

(Herbal Antidiarrhoeal and
gut regulator)

Diaracare is a unique composition of herbs that helps to modulate the gut health. The herbs present in this product helps to control diarrhea along with maintaining the electrolyte balance. This product also acts as a gut regulator and helps to improve nutrient absorption in the body.

Composition:

Aegle marmelos, Punica granatum, Woodfordia fruticosa, Acacia catechu along with other gut regulating herbs.

Benefits:

1. Helps to control loose dropping
2. Maintain electrolyte balance
3. Have Soothing effect on intestinal mucosa
4. Improve bird's performance including production and hatchability
5. Act as a potent gut regulator and have prebiotic action on gut
6. Helps to improve body weight gain

Usage:

For healthy gut functions: 250 g per tonne of feed

For disturbed gut functions: 500 g per tonne of feed

Packing: 25Kg

TRIOCHOL

(Herbal Choline)

Triochol is a herbal composition that helps to replace synthetic choline in the feed of the birds. It is highly bioavailable and helps in efficient utilization of the nutrients. It helps to efficiently utilize fat in the body along with improved bird performance.

Composition:

Citrullus colocynthis, Achyranthes aspera, Trigonella foenumgraecum along with other choline donor herbs.

Benefits:

1. Provide optimum activity of choline and biotin required for optimum health and production
2. Control fatty liver syndrome, perosis and liver enlargement
3. For maintaining growth, egg production, hatchability and livability in birds
4. Optimizes of liver functions

Usage:

500 g per tonne of feed

(To replace 1 kg of synthetic choline chloride 60 % and 150 mg of biotin)

Or as recommended by the nutritionist

Packing: 25Kg

LIVENRICH

(Herbal liver tonic)

Livenrich is a unique formulation that helps to protect liver from different types of stress. It helps in regeneration of liver cell along with hepatoprotective action.

Composition:

Achyranthes aspera, Andrographis paniculata, Eclipta alba, Phyllanthus emblica, Solanum nigrum, Tinospora cordifolia and other hepatoprotective herbs

Benefits:

1. Helps to maintain the proper functioning of the liver
2. Prevent early chick mortality
3. Improves hatchability, lowered egg rejection and better maternal antibody transfer as well as chick quality
4. Increasing body resistance against different viral and bacterial diseases
5. Better vaccination response and higher maternal antibody titre
6. Optimum feed utilization, growth and productivity
7. Prevent disease conditions like fatty liver haemorrhagic syndrome, Avian vibrionic hepatitis, mycotoxicity

Usage:

premix 250 g of premix per tonne of feed
(Ensure complete mixing of premix in feed)

liquid (Per day/ 100 birds)

Chicks: 5 ml, Growers: 10 ml

Layer/ broiler/ Breeders: 20 ml

(Administer by mixing in morning water for 7 days. Duration of usage may be extended in severe conditions)

Packing: 25Kg

VIROBOOST

(Herbal sperm enhancer)

Viroboost is a herbal product that helps to improve sperm quality and quantity in the male birds. It help to maintain vigour in the birds and improve number of sperms per ejaculation

Composition:

Spirulina, Shilajit, Phylanthusemblica, Mucunapruriens, Hygrophila and other herbs

Benefits:

1. Helps to improve sperm quality and quantity
2. Improve vigour in the male birds
3. Improve number of sperms per ejaculation
4. Improve fertility rate

Usage:

500 gm per ton of feed

Or

As recommended by the Veterinarian

Packing: 25Kg

FEMIBLOOM

(Ultimate solutions for respiratory distress)

Today, one of the most unavoidable problems faced by the poultry birds is the Respiratory diseases. It may be caused by bacteria, virus, climatic changes or other managemental factors. There are many secondary complications like respiratory distress, cough, gasping, weight loss, high morbidity and mortality associated with the respiratory diseases. Antibiotics can control the bacterial causes of the problem but not able to solve the secondary problems associated with it.

Responil is an ultimate herbal solution that helps to solve the secondary problems like coughing, increased mucus formation, severe respiratory tract inflammation, low feed consumption, weight loss etc. associated with the respiratory diseases.

Responil's herbal composition consisting of different types of herbs namely Vasaka, Tulsi, Yastimadu, Sunithi, Turmeric, Guduchi etc. along with Essential oils helps to counter the problems associated with the respiratory diseases. Responil have anti-inflammatory, expectorant, antiallergic, antihistaminic, antimicrobial, decongestant and bronchodilatory effects which help for faster recovery from the respiratory diseases.

Composition:

Vasaka, Tulsi, Yastimadu, Sunithi, Turmeric, Guduchi etc. along with Essential oils

Benefits:

1. Relieves secondary problems like respiratory distress, cough, gasping, and weight loss associated with the respiratory diseases
2. Maintains the bird's performance even in respiratory diseases like CRD, Coryza etc.
3. Minimizes secondary bacterial complications
4. Improves growth and performance in the birds
5. As a co therapy with antibiotics for prevention of production losses in CRD outbreaks
6. As a supportive to antibiotics for fast and complete recovery from severe respiratory infections

Usage:

Chicks – 2.5 ml, Growers – 5 ml

Layers/Broiler Finishers -10 ml

Breeder (at Lay) – 10 – 15 ml

For 5-7 days by mixing in drinking water or as advised by veterinarian.

In severe cases dose may be doubled & period of treatment may be increased

Packing: 25Kg

TRIVIO-CAL D

(Herbal liver tonic)

Trivio-Cal D is a unique formulation that helps to provide calcium, phosphorus and Vitamin D3 in birds. This product helps to improve bone strength along with improved shell quality in the birds. This product contain Calcium and Phosphorus in elemental form along with herbal Vitamin D3 that helps is faster action.

Composition:

Elemental Calcium, Phosphorus, Cissus quadrangularis, Uraria picta, Cestrum spp. along with other herbs

Benefits:

1. Provide calcium and phosphorus in its elemental form thereby prevent deficiency of calcium and phosphorus in birds
2. The natural herbs helps in proper absorption and utilization of calcium and phosphorus
3. Increases bioavailability of calcium and phosphorus
4. Maintain proper level of calcium and phosphorus even after post-peak production period
5. Improves egg production, egg shell quality and hatchability
6. Reduces egg breakages and thin shelled eggs in layer and breeders
7. Help in prevention of lameness, prolapse, cage layer fatigue, osteoporosis and osteomalacia related to calcium and phosphorus deficiency

Usage:

Layer and breeders per 100 birds

Chick – 10 gm growers – 15 gm

layers – 15 gm breeder at lay – 30 gm

Broilers – 1 kg per tonne of feed

Administer by mixing uniformly in feed for 7 to 10 days or as advised by the consultant

Packing: 25Kg

C NATURA

(Herbal C)

C Natura is one of the most important vitamins in Birds. Vitamin C helps to reduce stress in birds thereby improve bird performance. It also reduces the oxidative damages caused by the stress. Herbal Vitamin C is a unique composition of Herbs which have Vitamin C action. These herbs in combination not only helps to reduce stress but also improve nutrient absorption in the birds. As a herbal source, this product is easily absorb in the body and give highly effective performance.

Composition:

Phyllanthus emblica, Withania somnifera, Terminalia chebula and other Antistress Herbs

Benefits:

1. Reduction of mortality and losses due to oxidative stress
2. Proper growth and production in chicks, growers, layers and broilers during oxidative stress
3. Maintain immunity and enhancing stress threshold as well as livability
4. Improve Vaccine titre in birds
5. Prevent early chick mortality

Usage:

100 gm per tonne of feed
or as recommended by the nutritionist

Packing: 25Kg

FLYOCLEAR

(Herbal flyrepellant)

Flyoclear is a unique composition of herbs that helps to control flies in the farm. It will reduce fly nuisance in the farm. It also helps as a gut regulator thereby improve nutrient absorption and litter quality in the birds.

Composition:

Lemon grass oil, Neem oil, Tulsi oil, Eucalyptus oil, Cinnamon oil along with other fly repellent herbs

Benefits:

1. Help to control flies in the farm
2. Helps to control litter quality
3. Improve gut health
4. Improve nutrient absorption
5. Improve body weight gain and production

Usage:

200 gm per ton of feed

Or

As recommended by the Veterinarian

Packing: 25Kg

TRIVIOSEREN

(Herbal antitressor)

The modern day poultry breeds are developed genetically to yield maximum production at least possible time. This means that they are more susceptible to the different types of stressors and disease challenges. To counter this problem, different types of nutrients should be supplemented at an adequate level at all time. Herbal Antistressors not only helps to remove the stress in birds but also helps to improve nutrient absorption in the birds.

Herbal Antistressor is a unique herbal composition which provides synergistic action of herbs to reduce different types of stress in the birds. It improves bird's performance and immunity

Composition:

Phyllanthus emblica, Withania somnifera , Ocimum sanctum, Mangifera indica and other antistressor herbs

Benefits:

1. Reduces all type of stresses including vaccination, debeaking, climate, production, diseases etc.
2. Improves body immunity against different types of disease conditions
3. Improves fertility and hatchability in parent flocks
4. Improves antibody titre after vaccination
4. Prevent disease condition like Encephalomalacia and Exudative diathesis in poultry
5. Improves bird's performance in terms of growth and production

Usage: (Per day per 100 birds)

Chicks – 5 ml Growers – 10 ml

Layers/ Broiler Finishers – 15 – 20 ml

Breeder (at lay) – 20 – 25 ml

For 5 – 7 days by mixing in drinking water or as advised by Veterinarians

Packing: 25Kg
